

# COLLECT & HOLD SERVICES FOR ONCOLOGY CLINICAL TRIALS

## Securing Your Clinical Trial Images

MERIT's Collect and Hold services are designed to support early phase oncology clinical trials (up to 50 subjects) through the prospective collection and quality control of imaging data, that is – getting study images to a “ready-to-read” state. This is made possible by our streamlined, end-to-end software platform, EXCELSIOR™.

**Collect and Hold services include image collection and quality check, site support, and project management services.**

Ideal for early studies that need to collect longitudinal imaging data, or where centralized imaging review may be incorporated at a later point in time. Our services comply with FDA, EMA, and ICH guidelines, ensuring that all imaging data is collected and stored in accordance with regulatory requirements.

### SUBSCRIBE TODAY!

Our Collect and Hold services are a standard low annual cost of **\$4,999 per project for up to 50 subjects within sites in the USA.**

When the study expands to include reads and data management, you can even apply the Collect and Hold service fees towards the cost of the read.\*

*\*Certain restrictions may apply.*

This service provides clinical trial sponsors and research organizations with several benefits, including:

1. **COST SAVINGS:** Completely cloud-based with 24/7 availability of data **saves clinical trial sponsors time and money.**
2. **ACCELERATED TIMELINES:** Imaging data can be collected and stored in a secured centralized location as soon as patients are enrolled in a clinical trial. You can **analyze data quickly and make faster, more informed decisions.**
3. **IMPROVED QUALITY OF COLLECTED IMAGES:** MERIT's imaging quality control experts ensure the highest imaging data quality, with standardized acquisition and processing protocols, **providing reliable and reproducible data.**
4. **REDUCED VARIABILITY:** Data curation **at centralized location reduces** variability in imaging data across sites.

**\$4,999**  
Early Phase Studies

## Do you have a study with more than 50 subjects with multiple sites?

We can accommodate larger Collect and Hold projects with more than 50 subjects. Contact us today for more details.

## LEARN MORE

Contact us to learn more about MERIT's Collect and Hold services for oncology clinical trials and how they can benefit your study.

## WHY MERIT?

*Innovative. Proven. Experienced.*

MERIT has provided image collection, centralized reading, and data management services for clinical trials since 2012.

Using our innovative and proven technologies and intuitive, seamless workflows, MERIT's experienced staff bring more than a decade of clinical endpoint expertise to ensure the success and integrity of your independent imaging review studies.

- ✓ Single platform for all study data, queries, reporting/tracking, image transfer and analysis
- ✓ Oncology staff averages 10+ years clinical trial experience and many have advanced degrees
- ✓ Step-by-step Imaging Protocols, SOPs, and document support
- ✓ Indispensable regulatory support and guidance
- ✓ Established, time-tested Quality Assurance, security, and data privacy

Connect with us to learn more about how our expertise and approach can support bringing your product to market on-time and on-budget. Your success is our priority.
