

Accelerate Your Clinical Trials with EXCELSIOR

MERIT's EXCELSIOR™ technology platform increases accuracy and efficiency by providing a suite of advanced endpoint analysis tools designed based on our extensive collaboration with biopharma companies.

KEY FEATURES

CONVENIENT: Cloud-based single platform offers quick deployment with no need to install software or configure firewalls

CONFIGURABLE: Customizable configuration provides flexibility to address the wide range of workflow and data endpoints required for each unique study

TRANSPARENT: The dedicated user roles, integrated query messaging system, and cloud-based service provides real-time access and study progress transparency to all trial partners throughout the study timeline

BENEFITS

IMMEDIATE DATA TRANSFER: Effective and instantaneous transfer of data from one location to another. Data can be directly and automatically moved to the sponsor's data warehouse for further analysis

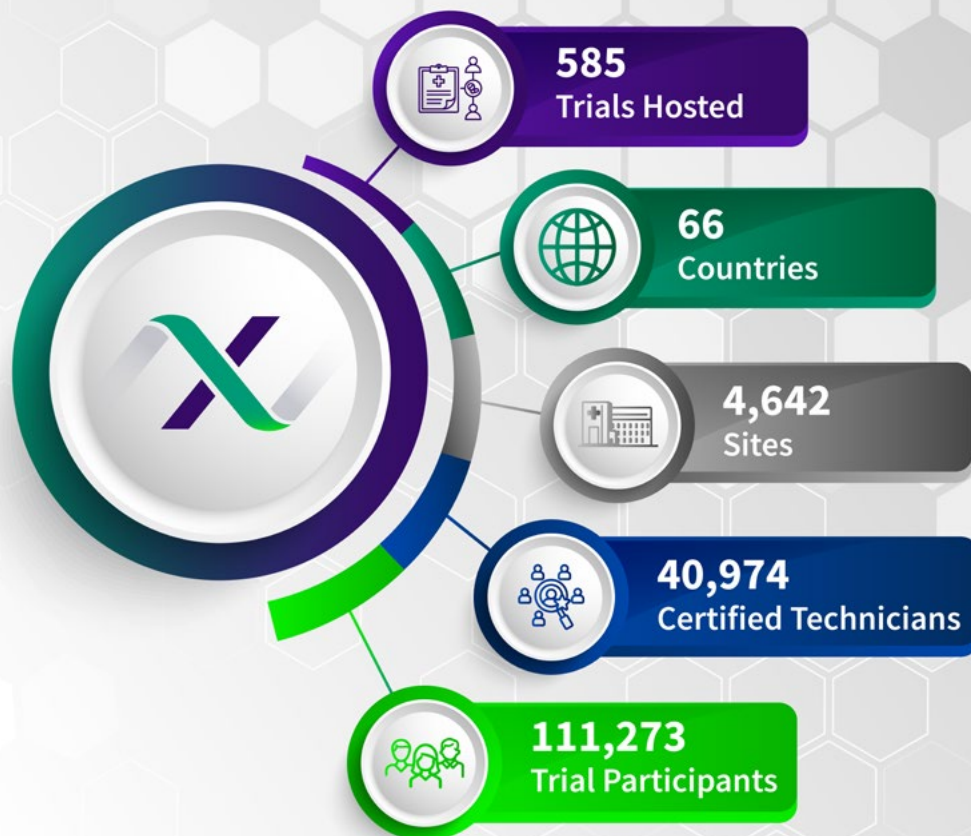

24/7 DATA ACCESS: All stakeholders have real-time access to the curated data. Sponsors can view study progress and data in a transparent, secure environment

NO GEOGRAPHIC LIMITATIONS: With cloud-based data infrastructure, data can be viewed and analyzed anywhere

Race Ahead of the Competition

Power Your Clinical Trials with **EXCELSIOR™**

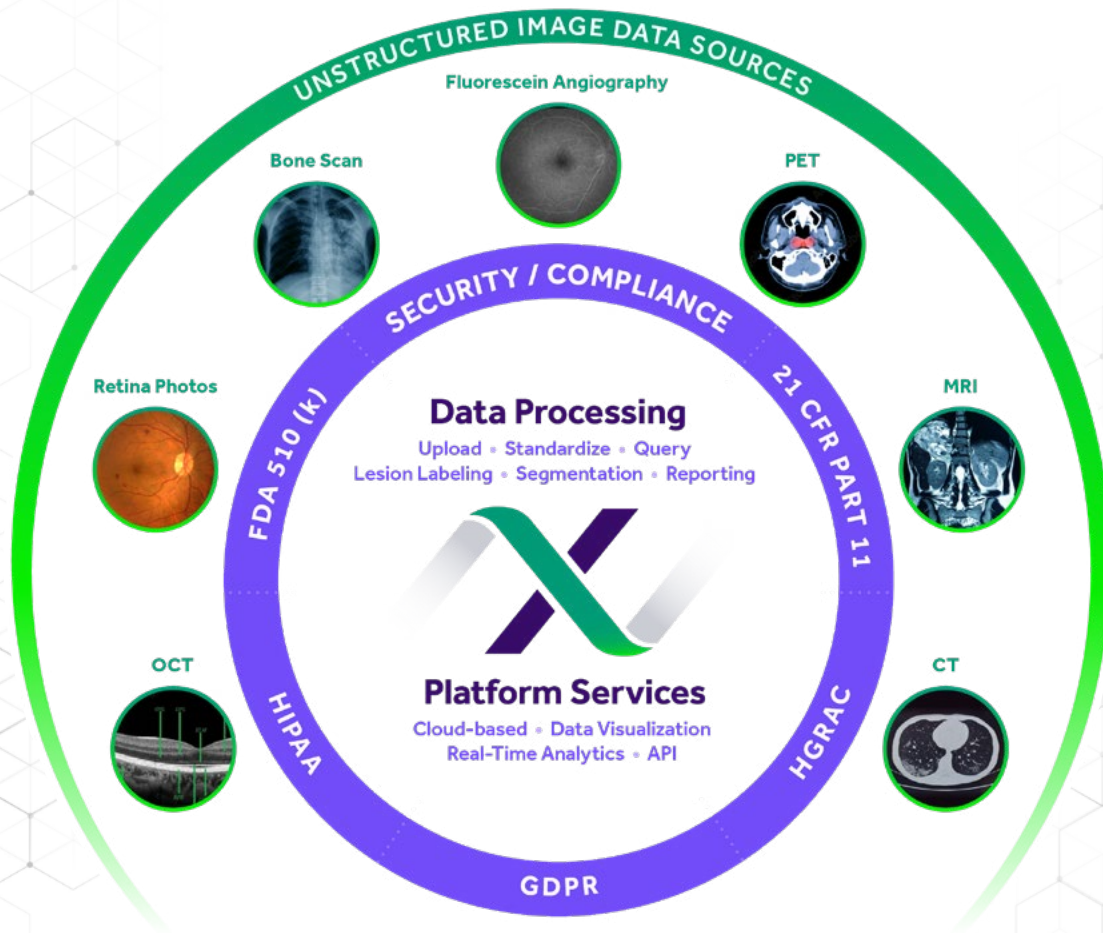

“EXCELSIOR is a simple, easy to navigate system. Queries are clearly defined. MERIT’s support staff are very helpful with the initial training process and remain engaged when issuing queries or if data issues arise. In comparison to (MERIT competitor software), which we use for many other trials, I would say you have the superior product overall, especially for ease of uploads.”

– Site Coordinator, EXCELSIOR User

IMAGING PLATFORM

MERIT's comprehensive, cloud-based software solution elevates efficiency and accuracy in the collection and interpretation of clinical trial imaging data. EXCELSIOR is built to meet regulatory requirements including HIPAA, 21 CFR Part 11, GDPR, and HGRAC.

MERIT's combination of advanced technology and exceptional service optimizes clinical trial stakeholders' imaging strategy and enhances trial success.

SPIROMETRY PLATFORM

Scalable & flexible to adapt to trials of all phases and sizes

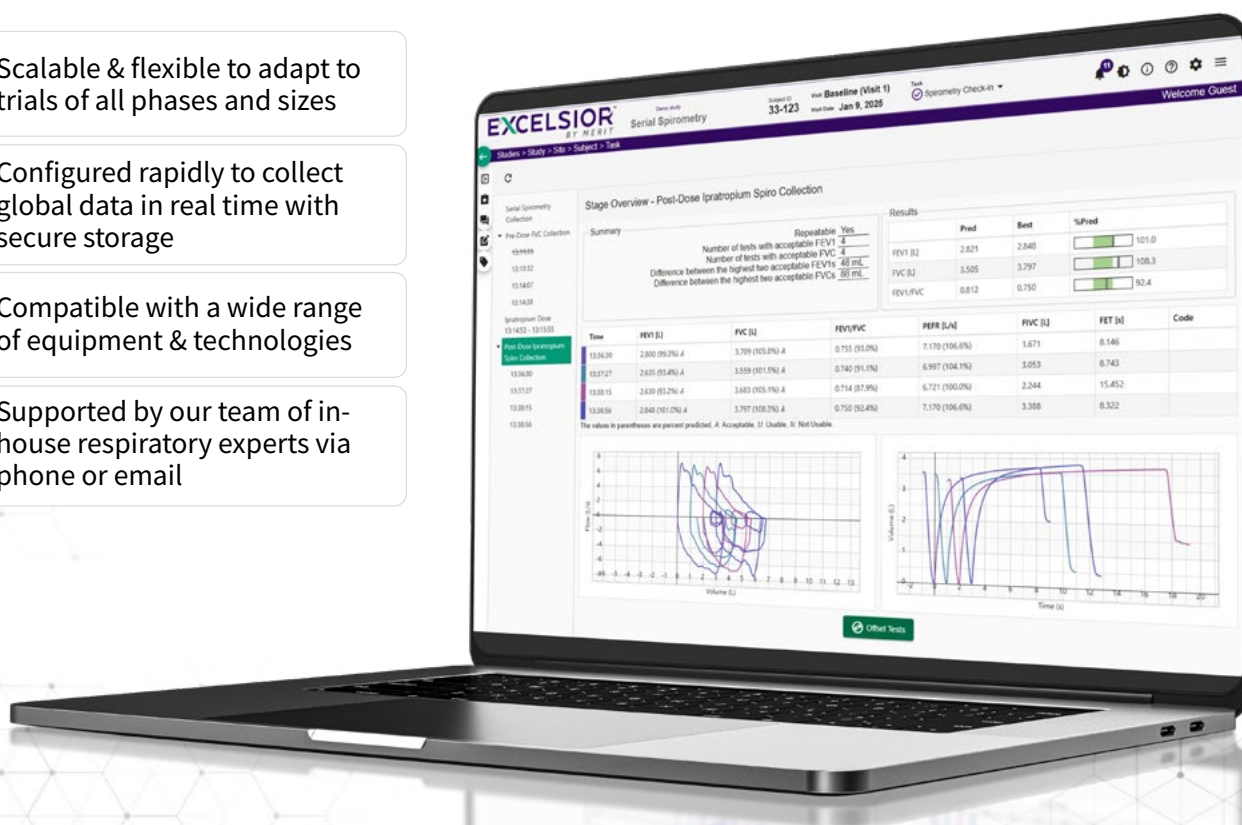

Configured rapidly to collect global data in real time with secure storage

Compatible with a wide range of equipment & technologies

Supported by our team of in-house respiratory experts via phone or email

Spirometry

- According to 2019 ATS/ERS guidelines
- Four attempted tests, all deemed acceptable by the site
