

Ophthalmology Imaging Solutions

MERIT's experts are adept in managing and evaluating morphologic and functional endpoint data in clinical trials across drugs and devices, either front or back of eye.

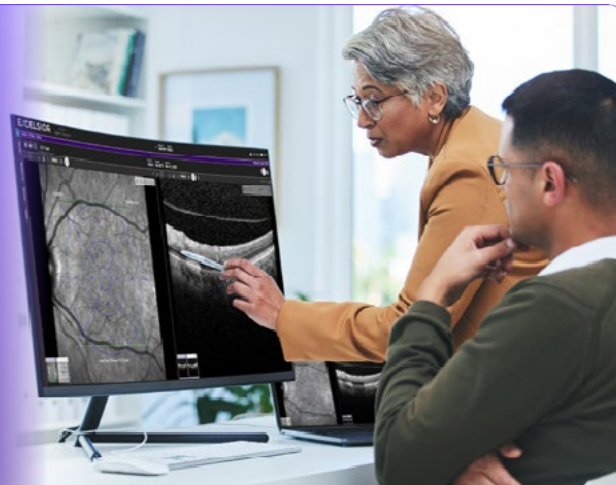

SPECIALIZING IN:

- Diabetic Retinopathy (DR)
- Inherited Retinal Disease (IRD)
- Dry AMD
- Endothelial Cell Health
- Retinal Vein Occlusion (RVO)
- Dry Eye Disease
- Anterior Segment
- Wet AMD
- Safety Endpoint
- Device/AI
- Uveitis
- Retinopathy of Prematurity (ROP)
- Glaucoma

MERIT's comprehensive portfolio of ophthalmic services ensures your research is conducted accurately and efficiently. We seamlessly manage the imaging components of your trial, creating efficiencies for your drug development.

IMAGING SERVICES:

- ✓ Site Image Acquisition & Upload
- ✓ Image Read & Adjudication
- ✓ Endpoint Assessments
- ✓ Protocol Design & Consultation
- ✓ Site Certification & Training
- ✓ Site Support

KEY OPHTHALMOLOGY ENDPOINT OFFERINGS:

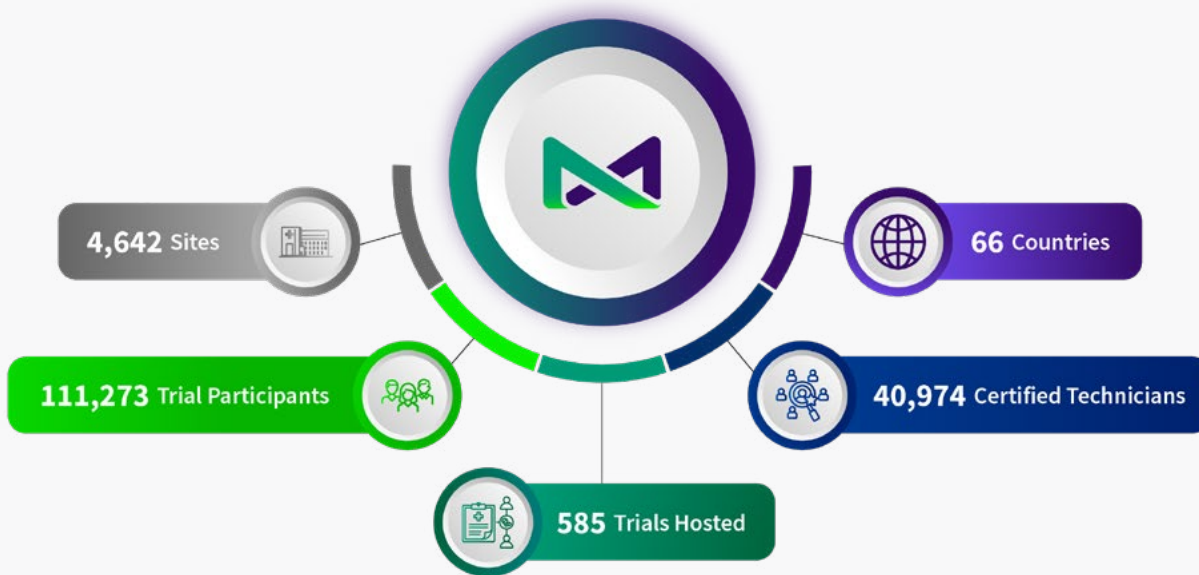

MORPHOLOGY

OCT/OCTA
FAF
Color FP
FA/ICGA
Slit Lamp Imaging
Specular Microscopy
B Scan Ultrasonography
IOL Rotational Analysis

FUNCTION

BCVA/LLVA
Microperimetry
Electroretinogram
Visual Evoked Potential
Pupillometry
MLMT
Light/Dark Adaptation
Static & Kinetic Perimetry
Contrast Sensitivity
Ocular Motor Instability

EXPERIENCE BY THE NUMBERS

Turbo Charge

YOUR OPHTHALMOLOGY TRIALS

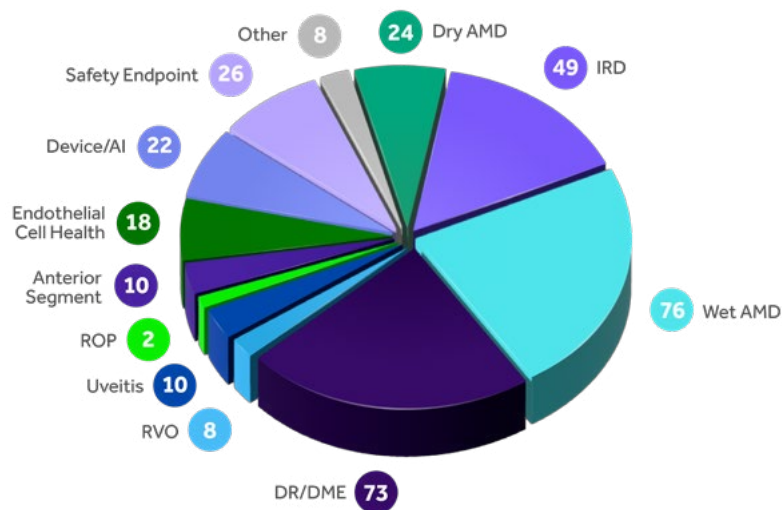

WITH **EXCELSIOR**[™]

Our comprehensive, cloud-based software platform, EXCELSIOR[™], allows immediate transfer of data directly from qualified sites to a central database for review without installing software or configuring firewalls. With MERIT your study data and images can easily be shared between clinical sites, reading centers, CROs, and sponsors for maximum transparency. This makes managing global ophthalmic trials involving multiple reading centers and analysis of multiple modalities not only feasible, but practical.

ADEPT ANALYSIS AND PROVEN SOLUTIONS WITH MERIT.

A successful multi-center trial requires intrinsic understanding of various imaging techniques, developing meaningful outcome correlations, and formulating computational methodologies. Our insightful experts help guide your selection of the right biomarkers that accurately reflect the characteristics of disease progression and treatment effects.
