

Exceptional Reading Center Services for Global Phase III Wet AMD Study

MERIT's ophthalmic expertise and cloud-based imaging platform EXCELSIOR™ performed a crucial role in a global Phase III Wet AMD study. Take a look at a few metrics from our case study:

Rapid Turnaround Time

MERIT's efficient, quick turnaround times for image processing & grading supported **48-hour turnaround** for eligibility. On average, the results of the eligibility visits were determined **within 6 hours**.

Complex Coordination

Our team **successfully managed** multiple Reading Centers, harmonized imaging data from many manufacturers, and evaluated various imaging modalities.

Volume of Data

MERIT ensured quality control and managed **85,448** total data series and **640,219** total images for **500** subjects at **150** sites worldwide.

Our exceptional reading center services for ophthalmic imaging can be easily configured to meet sponsor and study requirements. EXCELSIOR can be employed by our team of experienced experts to help Sponsors flawlessly manage all facets of a study.
